English Summary

It is our pleasure to offer you again a combined annual report of the mills 'De Ster' and 'De Lelie' and for the 'Stichting de Kralingse Snuif en Specerijen Compagnie De Ster en De Lelie'

To our regret this year Bas Batenburg left our team. His duty as a millwright and many other activities did not allow him to stay in our team.

This year's highlight was the award given by the customers of Gunther Hartmann Tabakvertrieb GmbH & Co. to our Chococreame snuff. They awarded the Chococreame snuff as their favorite snuff in 2014 as "Einem ihrer beliebsten Snuffs".

On request of several clients two new snuff types were introduced. Both are based on Flue Cured Virginia tobacco and are sieved with to different sieves sizes, 250mu and 400mu. The snuff is named FCV250 and FCV400. Also a snuff named Hollandse Snuif is introduced, it is based on fermented Virginia tobacco. Hollandse Snuif is flavoured with essential oil of Cascarrilla, extract of Sassafras wood, Elderberry blossom water, Honey and Wine vinegaren.

Our on wind power grinded cinnamon is also this year sold to the visitors of the mills but also three other shops belonging to other mills 'mill shops' sell our cinnamon. Grinded spices were also exported to the USA.

With thanks to Catz International BV we were able to introduce also on wind power grinded Dutch cookie spices and white pepper.

The 'Karottenfabriek' became unoccupied this year. Finally after 10 years an alternative home was found for our neighbour. Unfortunately we lost the opportunity to welcome large groups. We hope that the new destination of the 'Karottenfabriek' gives us this opportunity again.

We also wish to thank all people, companies and organizations that has supported the mill last year.
